Publication No. US2004015722A1

GENERAL INFORMATION

GENERAL INFORMATION

APPLICANT: VAN BRABANT, ANJA

TITLE OF INVENTION: METHODS AND COMPOSITIONS FOR REDUCING SCREENING IN

TITLE OF INVENTION: OLIGONUCLEOTIDE-DIRECTED NUCLEIC ACID SEQUENCE ALTERATION

TITLE OF INVENTION UNDER: US/10/681,074

CURRENT APPLICATION NUMBER: US/20/681,074

CURRENT FILING DATE: 2003-10-07

PRIOR FILING DATE: 2003-03-07

PRIOR FILING DATE: 2002-10-07

PRIOR FILING DATE: 2002-10-07

NUMBER OF SEQ ID NOS: 4375

SOFTWARE: PRIOR FILING DATE: 2002-110-07

LENGTHARE: PRIOR FILING DATE: 2005-110-07

Sequence 2472, Application No. US20030171311A1

GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals Inc.
ATTILE OF INVENTION: Braymatic Nucleic Acid Treatment of Diseases or Conditions Relater ITILE OF INVENTION: Hepatitis C Virus Infection
FILE REFERENCE: MHH800-801-F

CURRENT APPLICATION NUMBER: US/09/817,879

CURRENT APPLICATION NUMBER: US/09/817,879

CURRENT FILING DATE: 2001-03-26

NUMBER OF SEQ ID NOS: 9703

SOFTWARE: PatentIn version 3.0

LENGTH: 17

TYPE: RNA
     APPLICANT: Ribozyme Pharmaceuticals Inc.
TITLE OF INVENTION: Enzymatic Nucleic Acid Treatment of Diseases or Conditions Relaterities OF INVENTION: Enzymatic Solution of Diseases or Conditions Relaterities OF INVENTION: Hepatitis C Virus Infection
FILE REPERENCE: RPI 400/003
CURRENT APPLICATION NUMBER: US/09/740,332
CURRENT FILING DATE: 2001-03-26
NUMBER OF SEQ ID NOS: 9704
SEQ FURNER: Patentin Version 3.0
SOFTWARE: Patentin Version 3.0
LENGTH: 17
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           APPLICANT: Szymkowski, Edmund
TITLE OF INVENTION: Method and Reagent for the Inhibition of Calcium Activated Chlori
